Javier,

We can talk on Monday. Give me a call. You could let him know that we had to negotiate access last time, so he could be prepared for a possible denial of entry. You could also let hi know very generally that we have ongoing claims against multistar for violations of EPCRA/CERCLA, 112(r) and a compliance order on consent.

Well, as far as I know, Multi-Frost is still alive and well.

MultiStar is in litigation for an ammonia release at its facility, I believe it involves a truck. Their business practices are interesting.

If you do an internet search for Multi-Frost
MULTIFROST INC is active operating under USDOT Number 461410 and MC
Number 631877.
The business has one truck transporting liquid gas.

D&B D-U-N-S Number 175491331

Does MULTIFROST INC transport Hazardous Material?

NO

(HOWEVER...I know that they transport anhydrous ammonia, which is what was on their truck that crashed in WA several months ago and caused quite some headlines.)

**MULTIFROST INC
101 W Fir Street
Othello, WA 99344
[509-488-5601](tel:5094885601)
[509-488-5608](tel:5094885608)**

And yes, their office is MultiStar's office.

So,

The quandary.

Importance: High

Jerry,

The company says they released 20,000 pounds of ammonium hydroxide, which has a CERCLA RQ of 1,000 pounds so they still have reporting responsibilities under CERCLA. This reporting threshold can be found in EPA's "List of Lists." If they had instead released anhydrous ammonia, the reporting threshold for that release would have been 100 pounds.

I have included Kathleen LeGreid on this email, an EPCRA inspector for EPA. Hopefully you can touch base with her before you leave for your inspection with this facility. She can also be reached at 360 753 9477.

Diane,

This e-mail string is what little information I have gathered to date concerning Multi Frost. I want to conduct an unannounced complaint investigation of Multi Frost this next Thursday.

ERM is the consultant working on behalf of its client in North Dakota. The North Dakota company retained ERM to assist with completion and submittal of a Form R Report and is concerned about the disposition of the anhydrous ammonia. Apparently the only information sent from Multi Frost to the North Dakota company about the disposition of the anhydrous ammonia is: Multi-Frost removed 20,000 lbs of ammonia from the North Dakota facility and brought it to their base in Othello where it was stored in a vessel and any oil was allowed to settle out. The remaining ammonia is "reacted into ammonium hydroxide and allowed to naturally evaporate into the air". ERM consultant Carol Fortman told me by phone that Multi Frost arranged to ship the anhydrous ammonia from North Dakota to Othello under an ordinary shipping paper.

I talked to WA Dept. of Agriculture Fertilizer Inspector Brent Perry this morning about this. Brent tells me that Multi Star discontinued its anhydrous ammonia fertilizer business some years ago and now only conducts refrigeration repair work.

I want to include another e-mail not in this string from Carol Fortman-ERM on 8/17/2017 at 12:20 PM that reads:

"Hi Gerald-

I looked closer at the document sent by them and they are Multi Star, doing business as Multi Frost. I think I had been in contact with a receptionist.

Thanks,
Carol"

Please send me any information you have about what CRTK rules that Multi Frost should be compliance with on this matter. I want to know what to ask and look for. There are some unknowns yet to be found on this.

Thanks,

Kathleen & Javier,

Giving you a heads up that I will be going to Multi Frost next week Thursday 7/31/18.

Let me know if you have additional information or did any sort of inspection on Multi Star of recent. Any specific items you might need to know about or what I should look for that I can forward back to you?

Let me know.

Well, as far as I know, Multi-Frost is still alive and well.

MultiStar is in litigation for an ammonia release at its facility, I believe it involves a truck. Their business practices are interesting.

If you do an internet search for Multi-Frost
MULTIFROST INC is active operating under USDOT Number 461410 and MC
Number 631877.

The business has one truck transporting liquid gas.

D&B D-U-N-S Number 175491331

Does MULTIFROST INC transport Hazardous Material?

NO

(HOWEVER...I know that they transport anhydrous ammonia, which is what was on their truck that crashed in WA several months ago and caused quite some headlines.)

MULTIFROST INC
101 W Fir Street
Othello, WA 99344
[509-488-5601](tel:509-488-5601)
[509-488-5608](tel:509-488-5608)

And yes, their office is MultiStar's office.

So,

The quandary.

Kathleen A. LeGreid | EPA Region 10 | OCE, Pesticides and Toxics Unit | EPCRA/CERCLA (SEE) Inspector | (360) 753-9477 (Fax) 360-753-8080 | WOO 300 Desmond Drive SE, Suite 102 | Lacey WA 98503 (SEE) Program Employee | ¹⁰ ^ ⁰ Assisting the EPA under an agreement with NOWCC/NAPCA. {☪☪}

The objective of the Emergency Planning and Community Right-To-Know Act (EPCRA) is to: (1) allow state and local planning for chemical emergencies, (2) provide for notification of emergency releases of chemicals, and (3) address communities' right-to-know about toxic and hazardous chemicals.

Subject: RE: Multi-Frost
Importance: High

Jerry,

The company says they released 20,000 pounds of ammonium hydroxide, which has a CERCLA RQ of 1,000 pounds so they still have reporting responsibilities under CERCLA. This reporting threshold can be found in EPA's "List of Lists." If they had instead released anhydrous ammonia, the reporting threshold for that release would have been 100 pounds.

I have included Kathleen LeGreid on this email, an EPCRA inspector for EPA. Hopefully you can touch base with her before you leave for your inspection with this facility. She can also be reached at 360 753 9477.

Diane,

This e-mail string is what little information I have gathered to date concerning Multi Frost. I want to conduct an unannounced complaint investigation of Multi Frost this next Thursday.

ERM is the consultant working on behalf of its client in North Dakota. The North Dakota company retained ERM to assist with completion and submittal of a Form R Report and is concerned about the disposition of the anhydrous ammonia. Apparently the only information sent from Multi Frost to the North Dakota company about the disposition of the anhydrous ammonia is: Multi-Frost removed 20,000 lbs of ammonia from the North Dakota facility and brought it to their base in Othello where it was stored in

a vessel and any oil was allowed to settle out. The remaining ammonia is "reacted into ammonium hydroxide and allowed to naturally evaporate into the air". ERM consultant Carol Fortman told me by phone that Multi Frost arranged to ship the anhydrous ammonia from North Dakota to Othello under an ordinary shipping paper.

I talked to WA Dept. of Agriculture Fertilizer Inspector Brent Perry this morning about this. Brent tells me that Multi Star discontinued its anhydrous ammonia fertilizer business some years ago and now only conducts refrigeration repair work.

I want to include another e-mail not in this string from Carol Fortman-ERM on 8/17/2017 at 12:20 PM that reads:

"Hi Gerald-

I looked closer at the document sent by them and they are Multi Star, doing business as Multi Frost. I think I had been in contact with a receptionist.

Thanks,
Carol"

Please send me any information you have about what CRTK rules that Multi Frost should be compliance with on this matter. I want to know what to ask and look for. There are some unknowns yet to be found on this.

Thanks,

Carol,

Thanks for sending this information.

I did some work at a site in Othello named as Multi Star which is similar to what you briefly explained to me by phone this morning. See this link: <http://multistar-inc.com/> Could Multi Star be the actual name of the company rather than Multi Frost?

Washington Secretary of State records has nothing on a company named as Multi Frost. They do have records for Multi Star in Othello. Please review this link and verify with what information you have. Did you communicate to a Pete Vanourek? If so then I have met him before. https://www.sos.wa.gov/corps/search_detail.aspx?ubi=601081464

Hope to hear from you soon.
